

## PYSANKY DESIGNS IN STEPS:

The first page of designs (p. 17) will be divided into 3 steps, as explained below. Use 3 dyes: a light one (yellow, or a quick dip into orange or pink), a medium one (orange, pink, bright red, etc.) and a dark one (red, blue, violet, green, brown, black, etc.).

Step 1. Draw this design on your white egg, dip into the light colored dye, remove and pat dry.

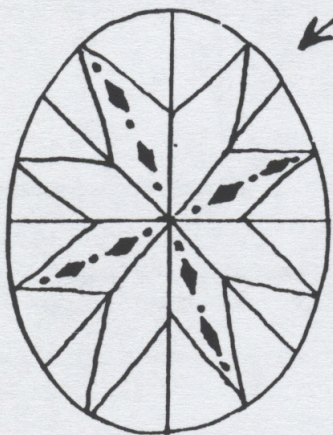

Step 2. Add the designs you see here that are not in Step 1., onto your light colored egg. Now dip in medium dye. Remove and pat dry.

Step 3. Add designs you see here that are not in Step 2., onto your medium colored egg. Dip into dark dye. Remove, pat dry, wait 10 minutes, remove beeswax and varnish.

### FOR SPOT DYEING:

Do Step 1. as instructed. Then put in these designs with a toothpick or clean end of matchstick, using unusual colors (aqua, mauve, etc.). Try mixing a teaspoon of yellow dye with a teaspoon of any dark dye to obtain unusual colors. Keep these "spot-dyes" in plastic pill bottles. Pat the spot dye dry. If dye smears, don't worry. Cover with your stylus and beeswax only what you want to remain aqua or mauve - the smeared areas will be dyed out in the following dyes. Now, go on to Step 2, etc
